

# ChkLines - Free Web Hosting

We all love free stuff. Free tacos, free beer, or even a free T-shirt we know we'll never wear. When people hear the word "free," they just can't help themselves.

So why should our web hosting be any different? While there are times you should use paid hosting, sometimes you just want to throw a project up quickly and be done with it — at no cost.

Never make yourself feel bad for looking at free website hosting services. If you want to save money, nothing's cheaper than free.

Free hosting sites can help your marketing by creating backlinks to your blog.

Most free hosting sites do not permit ecommerce. Not to worry. Use these free sites to link to your own main sites and money pages.

### 10 Best "Free" Hosting Sites

- **Wix.com.** A strong, browser-based website builder, **Wix.com** reigns supreme if you want a simple, drag-and-drop interface for building basic sites (i.e., for portfolios, small sites, etc.). ...
