## Free and paid domains

Freenom is the world's first and only free domain provider. Our mission is to bring people online and help countries develop their digital economy. Free domains work exactly like any other domain name. You can use it for your website, your blog, email account and more! You can choose to run your free domain with URL Forwarding, free Freenom DNS Service or your own DNS (Name servers). Domain extensions currently available for free registration:

Freenom now manages a number of free domains, which you can register for free.

“Freenom is the world's first and only free domain provider. Our mission is to bring people online and help countries develop their digital economy.”

In addition, Freenom has the lowest prices I have seen for .com and other commercial paid domain names.

A few others may still be in existence, but tend to be hard to take advantage of.
